

The Prayer of Saint Francis of the Allegorian Galaxy

*Infinitely beautiful Mother Universe
make each of our hearts a fractal instance
of your endless awareness, love, understanding and vitality
woven together, inside of us, between us and among all life forms
into the braid of eternal life.*

*Where there is injury, across the countless stars,
may we embody such radiant mercy
as to awaken the forgiveness that sleeps in all.*

*Where there is absent-hearted-ness
and absent-minded-ness
among the 2-leggeds and 7-leggeds
may we embody a fully present compassion
that awakens the compassion sleeping in all.*

*Where there is deadness masquerading as life
may we embrace life with such gratitude
as to awaken the love of life
sleeping in all creatures.*

*Where there is sorrow
among the myriad universes
may each of our hearts be a spacetime window
through which your Loving Presence may become
ever more manifest in the visible transmission spectrum.*

*Wheresoever we shall strive to mend
may we find in the indwelling presence of your Infinite Heart
a kindness deeper and stronger than all conflict.*

*Wheresoever we shall strive to heal
may we find in the indwelling presence of your Infinite Heart
a beauty deeper and stronger than all wounds.*

*May we be true to the creative life you Breathe into us every moment
and may we live in the spiral radiance of your love forever.*
